ALTERNATE PATHWAY TO SUBSPECIALTY CERTIFICATION
(formerly “Certificate of Added Qualifications”)
IN NEURORADIOLOGY, NUCLEAR RADIOLOGY, PEDIATRIC RADIOLOGY,
AND VASCULAR & INTERVENTIONAL RADIOLOGY

A diplomate of the ABR may attain subspecialty certification without taking an accredited fellowship.

Requirements: ABR diagnostic radiology certification, followed by a two-year faculty appointment with full-time clinical responsibility in the subspecialty area, at a single institution (including affiliated/participating institutions) with an ACGME-accredited fellowship training program in the area of subspecialty certification desired provides for entry to the ABR subspecialty certification examination. Serving on the subspecialty faculty at a single institution for two consecutive years with at least a .75 FTE in that discipline, or for three consecutive years with at least a .50 FTE in that discipline, would qualify the faculty member to take the initial subspecialty examination.

The ABR retains the right and responsibility to exercise Board discretion concerning the request of any individual to enter the examination process.

Please note: This policy is subject to amendment from time to time. Candidates and diplomates are advised to check the ABR website periodically for the most current version.
