

BREAST IMAGING

1. Screening (5-10%)
 - a. Anatomy
 - b. Lesion detection/CAD
 - c. Risk analysis (demographics)
2. Regulations/Standards (5-10%)
 - a. BIRADS
 - b. Medical audit
 - c. MQSA
3. Technique (5-10%)
 - a. Views
 - b. Positioning
 - c. Equipment
 - d. Image display/MR CAD/US harmonics/workstations/etc.
4. Pathology (5-10%)
 - a. Benign breast disease
 - b. High risk lesions
 - c. Invasive ductal NOS
 - d. DCIS
 - e. Special types
5. Symptomatic (5-10%)
 - a. Discharge
 - b. Lump/thickening
 - c. Nipple retraction/skin changes
6. Inflammatory (1-5%)
7. Calcifications (5-10%)
 - a. Benign
 - b. Malignant
8. Masses (5-10%)
 - a. Benign
 - b. Malignant
9. Architectural distortion (1-5%)

10. Asymmetries (1-5%)
11. Lymph nodes (1-5%)
12. Male (1-5%)
13. Implants (1-5%)
14. BC Workup (5-10%)
 - a. Staging/surgical planning
 - b. Specimen radiography
 - c. Post BCT
15. Physics (15-20%)
16. Quality and Safety (5-10%)
