

AMERICAN  
BOARD OF  
RADIOLOGY

## GASTROINTESTINAL

1. Pharynx/esophagus (1-5%)
  - a. Technique of examination
  - b. Normal anatomy, variations and function
  - c. Benign diseases
  - d. Diverticuli
  - e. Foreign bodies
  - f. Trauma
  - g. Motility disorders
  - h. Esophagitis
  - i. Rings, webs, strictures
  - j. Varices
  - k. Benign tumors and tumor-like conditions
  - l. Extrinsic processes affecting the esophagus
  - m. Hiatal hernia
  - n. Malignant tumors
  - o. The postoperative esophagus
  
2. Stomach (5-10%)
  - a. Techniques of examination
  - b. Normal anatomy, variations and function
  - c. Benign disease
  - d. Malignant disease, primary and metastatic
  - e. The postoperative stomach, expected appearance and complications
  
3. Duodenum/small bowel (5-10%)
  - a. Techniques of examination
  - b. Normal anatomy, variations and function
  - c. Benign diseases
  - d. Malignant diseases
  
4. Colon, appendix (10-15%)
  - a. Techniques of examination
  - b. Normal anatomy, variations and function
  - c. Benign disease
  - d. Malignant disease
  
5. Pancreas (5-10%)
  - a. Techniques of examination
  - b. Normal anatomy, variations and function
  - c. Pancreatitis
  - d. Pancreatic neoplasms

- e. Transplantation
6. Liver (15-20%)
    - a. Techniques of examination
    - b. Normal anatomy, variations and function
    - c. Diffuse diseases of the liver
    - d. Focal diseases of the liver
  7. Spleen (1-5%)
    - a. Techniques of examination
    - b. Normal anatomy, variations and function
    - c. Splenomegaly
    - d. Focal lesions
    - e. Abscess/microabscesses
    - f. Granulomatous disease
    - g. Trauma
  8. Gall bladder, biliary (1-5%)
    - a. Techniques of examination
    - b. Normal anatomy, variations and function
    - c. Congenital abnormalities
    - d. Benign Disease
    - e. Malignant Disease
  9. Peritoneum and retroperitoneum (1-5%)
    - a. Techniques of examination
    - b. Normal anatomy, embryology, variations and function
    - c. Fluid collections
    - d. Inflammatory diseases
    - e. Primary tumors
    - f. Metastatic tumors
    - g. Mesenteries
    - h. Retroperitoneum
  10. Multisystem (10-15%)
    - a. Techniques of examination
    - b. Acute abdomen
    - c. Trauma to the abdomen
    - d. Syndromes involving the Gastrointestinal Tract
    - e. Hernias
    - f. Obstruction
  11. Physics (15-20%)
  12. Quality and safety (5-10%)
