

## PEDIATRICS

1. Neuroradiology (~15-20%)
  - a. Inflammatory/infectious
  - b. Neoplastic
  - c. Traumatic
  - d. Congenital/syndrome
  - e. Toxic/metabolic
  - f. Normal variant
  - g. Vascular
  - h. Idiopathic
  - i. Normal/growth and development
  
2. Cardiovascular (~5-10%)
  - a. Inflammatory/infectious
  - b. Neoplastic
  - c. Traumatic
  - d. Congenital/syndrome
  - e. Toxic/metabolic
  - f. Normal variant
  - g. Vascular
  - h. Idiopathic
  - i. Normal/growth and development
  
3. Chest/pulmonary/lung (~10-15%)
  - a. Inflammatory/infectious
  - b. Neoplastic
  - c. Traumatic
  - d. Congenital/syndrome
  - e. Toxic/metabolic
  - f. Normal variant
  - g. Vascular
  - h. Idiopathic
  - i. Normal/growth and development
  
4. GI (~15-20%)
  - a. Inflammatory/infectious

- b. Neoplastic
  - c. Traumatic
  - d. Congenital/syndrome
  - e. Toxic/metabolic
  - f. Normal variant
  - g. Vascular
  - h. Idiopathic
  - i. Normal/growth and development
5. Multisystem disease (~10-15 %)
- a. Inflammatory/infectious
  - b. Neoplastic
  - c. Traumatic
  - d. Congenital/syndrome
  - e. Toxic/metabolic
  - f. Normal variant
  - g. Vascular
  - h. Idiopathic
  - i. Normal/growth and development
6. GU (~10-15%)
- a. Inflammatory/infectious
  - b. Neoplastic
  - c. Traumatic
  - d. Congenital/syndrome
  - e. Toxic/metabolic
  - f. Normal variant
  - g. Vascular
  - h. Idiopathic
  - i. Normal/growth and development
7. MSK (~10-15%)
- a. Inflammatory/infectious
  - b. Neoplastic
  - c. Traumatic
  - d. Congenital/syndrome
  - e. Toxic/metabolic
  - f. Normal variant
  - g. Vascular
  - h. Idiopathic
  - i. Normal/growth and development
8. Fetal (~1-5%)
- a. Inflammatory/infectious
  - b. Neoplastic
  - c. Traumatic
  - d. Congenital/syndrome
  - e. Toxic/metabolic

- f. Normal variant
- g. Vascular
- h. Idiopathic
- i. Normal/growth and development

9. Quality and Safety (5-10%)
